Wednesday, March 25, 2026 8:50 PM

objectives :-

- A Canvas type Software
- A techer can make assingment
- A teacher can either manually check the assignment or assing the ai agent for it.
- A techer can instruct the AI Assistant to send emails to the students
- A Student can see the assignment, upload, Join Class, ask AI TA for specific information, or a course material.

The Software/webapp will have 3 roles

- techer (Public)
- Student (Public)
- Admin (Public)

End points

Techers

prefix = /teacher
